

Does your family have a history of Alzheimer's disease beginning **before age 60** in multiple generations? Or is there a mutation on the PSEN1, PSEN2, or APP gene in at least one family member?

You can contribute to important research on Dominantly Inherited Alzheimer Disease.

Join the DIAN Expanded Registry at dian.wustl.edu

- Learn about research participation* opportunities, including clinical drug trials, observational study, and exploratory genetic counseling and testing
- Get invitations to educational webinars and conferences
- Receive periodic research updates

*Must be 18 years of age or older
